PROFESSIONAL SUMMARY

Software engineer with four years of experience owning production commerce storefronts for international brands. Strong in React, TypeScript and performance engineering, with measurable improvements to speed, accessibility and conversion. Comfortable across the stack — from storefront architecture and API integrations to full-stack applications — and in working directly with designers, marketers and product owners.

EXPERIENCE

Shopify Developer · **GRENION Brands** Jan 2022 — Present

Berlin, Germany (Remote) · Banana Beauty, HelloBody, MyRapunzel, Sophie Rosenburg

- Owned end-to-end development and maintenance of 4 production Shopify storefronts, from theme implementation through deployment
- Improved storefront performance through asset optimization, lazy loading and JavaScript cleanup
- Built reusable theme components with Liquid, JavaScript/TypeScript and React across the Dawn, Horizon and Concept themes, plus headless components with Shopify Hydrogen
- Integrated Shopify apps, APIs and third-party services; ran A/B testing experiments with marketing to lift conversion
- Shipped through Git/GitHub workflows with CI/CD, working directly with designers, marketers and product owners

Project Manager · **KEDS** Sep 2019 — Jan 2023

Kosovo Electricity Distribution Company

- Managed electrical distribution projects from planning through delivery, coordinating field teams and contractors
- Produced technical reports and data analysis to support engineering and investment decisions
- Oversaw site engineering, ensuring specifications, timelines and safety standards were met

SELECTED PROJECTS

Shitblej React · Node.js · Express · MongoDB · Socket.IO shitblej.netlify.app

Full-stack peer-to-peer marketplace with a server-enforced offer, counteroffer, checkout and order flow, real-time messaging and an AI-assisted listing tool.

Alfa Rent a Car Next.js · TypeScript · Prisma · PostgreSQL github.com/endritbejta/alfa-rent

Rental platform with a public booking site and a role-based admin dashboard; double-booking is prevented by a database exclusion constraint.

Alfa Trade React · Tailwind CSS · Framer Motion alfa-trade.netlify.app

Corporate website for a petroleum distributor (client project): ten routes, product catalog and a bilingual Albanian/English interface.

Minimalist E-commerce React 19 · Vite · Tailwind CSS · Vitest github.com/endritbejta/minimalist-e-commerce

Storefront with cart and one-page checkout; business logic kept framework-free and unit-tested outside the components.

Offline Music Player React Native (New Architecture) · TypeScript

Cross-platform mobile music app with offline playback; patched a native audio library for New Architecture compatibility.
